There's quite a difference between a computer and a teacher -- and the digital revolution has brought major shifts in teaching and learning. The difference is the feel and the emotion that goes along with the computer. Feelings of being friend, brother, or girlfriend. Physically, we say teacher and student when we refer to a computer, but emotionally we often call them friends. This new technology encourages young people to write and e-mail to each other and to keep a journal. Most computers, even the laptop ones, have e-mail programs. Most of them also have the capability to access the Internet. In schools that have e-mail capability, you'll probably find that students have very

---

little fear that their e-mail will be read. This is not the case with school-to-school communication or classroom-to-classroom communication. Many students and teachers do not want their e-mail read by those with whom they share a classroom. Parents often worry about the reactions of their children when they send e-mail to them or discuss their lives with their children. They worry about the non-educational aspects of the Internet. When they were our children, we worried about our children being on the Internet. We worried about our children being online with "bad" people. We worried about our children being online in a place where there was no adult supervision. We worried about the ability of our children to use the technology because we had not been born with the hand-eye coordination of a computer mouse. We worried that our children would become

---

addicted to their televisions. We worried that the digital revolution would lead to a revolution that would make the nuclear bomb seem like a piece of wood and a pencil. E-books are another aspect of the digital revolution. E-books are a variation of what we know as traditional paper books. E-books provide a much better experience for the author. The author can add pictures, video, special effects, and hyperlinks. E-books can be easily downloaded onto the computer of the reader. There are many examples of children using e-books -- Digital Toddler is an example. The reader is able to read the story, but there are also books that contain lessons. These are books that provide
